SKYLINER III

Maximum comfort for your home

HIGHLIGHTS

ROLLING

Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.

KNEADING

Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.

AIR COMPRESSION

Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.

CARBON HEATING

Deeply penetrating Carbon infrared heat, blood vessels expand, the blood flow increases and the muscle tone is reduced. In addition, it carries out a highly beneficial effect on nerve cells, which are responsible for reporting pain to the brain.

JADE HEAT

Jade is a natural store and conductor of heat. These high-quality jade stones, purposefully integrated in the massage heads dispense deep warmth and a relaxing effect.

BELT HEATER

The unique belt heater with innovative graph heating, warms not only the shoulders, but also the back, waist and abdominal area. The built-in graph heat can reduce coldness and relieves pain.

SOLE ROLLER

The foot massage stimulates the nerve endings and certain organs of the body, which also relaxes the muscles.

I-OPEN FLEXIBLE RAIL

While lowering the massage chair into the lying position, the angle of the guide rail will be increased. This creates a more comfortable lying feeling, relieves the spine and intensifies the massage experience.

ZERO SPACE

For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!

ZERO GRAVITY

You put yourself in the position of an astronaut – that “weightless feeling”.

AUTOMATIC

Specifically developed automatic programmes for the whole body, which offer a big range of different massage techniques. Additionally you can also turn on the heating function, if you'd like.

MEMORY

Using the intelligent memory function the massage chair remembers your favourite massage exactly and begins immediately without a scan.

BACK AREA

An individual applicable to any size massage area.

ARTHOSE TRACTION

Arthrosis Traction consists of gentle stretching pressure. It has a stimulating effect on the cartilages, which enhances the transport of bodily fluids, nutrients absorption and can alleviate symptoms of arthrosis.

ADJUSTABLE FOOTREST

The footrest can be extended, this way it is adaptable to different body sizes.

ADJUSTABLE PILLOW

If necessary, the double cushion can be placed to reduce the neck and shoulder massage intensity.

RECLINE POSITION

The adjustability of the backrest and footrest contributes to personal well-being of the body position.

ADJUST SHOULDER

The massage heads can be moved upward or downward to a suitable position in the shoulder area.

AIR INTENSITY

Adjustable airbag massage intensity.

AIR AREA

Whole body airbag massage. Different areas are individually selectable.

4D MASSAGE

The 4D L-Track massage has been improved to provide a wider, deeper and more rhythmic massage than conventional massage rollers. This 4D massage is the most realistic like-from-hand massage in on the market.

SHIATSU

Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to simulate individual parts of the body and to mobilise the muscles.

SHOULDER GRASP

Targeted kneading massage in the shoulder/neck area – ideal for easing tension and pain in this area

SPOT

The massage heads can massage a particular spot.

SPEED

Massage speed is adjustable.

WIDTH

The distance between the both massage heads can be set (narrow, medium and wide).

MUSIC

Further relaxation and fun with the music function.

BLUETOOTH

A wireless connection to your smartphone or tablet ensures a facilitated music experience.

ACUPRESSURE POINTS

Key acupressure points are massaged.

REFLEXOLOGY

Reflexology regenerates foot muscles and has a harmonizing effect on almost all organs inside your body.

HUMAN HANDS FEELING

Specially designed massage heads imitate the hand motion of a professional masseur. The maximum stretch space is 6,5 cm, and the maximum stretch angle is 41 degrees, so the mechanical hands can do effective massage to human cervical vertebra thoracic vertebra and lumbar vertebra.

O2 IONIZER

Polluted air around you will be neutralized and you will breathe purified oxygen during your massage.

QUICK START

With one touch the quick start buttons in your armrest allow you to control the most important functions.

USB-CHARGER

While you relax, the integrated USB port can supply, for example, your phone with power.

DUAL SENSOR BODY SCAN

The massage chair performs a body scan to capture the main areas of the neck and back to ensure optimal pressure throughout the massage. The scan technology detects the height of your shoulders, that can be modified after the scan, if required.

BLUETOOTH AMPHITHEATRE SOUND SPEAKER

The massage chair is equipped with Bluetooth technology and an amphitheatre sound system that reduces ambient noise and boosts your sound experience. In this way you can enjoy your massage even with your favourite meditation application or your favourite music. We recommend starting the Bluetooth speakers with the lowest volume before playing music and then gradually increasing them to your desired level.

VOICE CONTROL

Use the voice control to activate selected functions.

WIRELESS CHARGER

Wireless charging function for NFC-smartphones.

HEALTH DETECTION

A built-in pulse oximeter records important data such as heart rate, blood oxygen content, microcirculation and fatigue level. Based on this data, the appropriate massage program is determined individually. So you get a massage that is adapted to your specific needs.

PURE RELAXATION WITH THE SKYLINER III MASSAGE CHAIR - NOW WITH PULSE OXIMETER AND JADE HEAT!

Leave the stress and tension of everyday life behind and treat yourself to the ultimate massage experience with our high technology Skyliner III massage chair.

The Skyliner III has an integrated pulse oximeter that automatically adjusts the massage to your current physical needs and ensures an individual treatment. Let yourself go while the chair recognizes and respond to your needs.

The Skyliner III massage chair offers a variety of massage functions, including kneading, tapping, rolling and shiatsu massage. You can choose from different programmes and intensity levels to get a customized massage, just the way you like it. Whether you're looking for gentle relaxation or an intense deep massage - this chair will meet all your needs.

Another highlight is the jade heat technology of the Skyliner III. The jade plates in the back and seat area gently heat up and give off a soothing, therapeutic warmth. This heat enters deep into your muscles and relieves tension effectively.

In addition, the Skyliner III is covered with high quality synthetic leather that is long-lasting and durable. The elegant design fits perfectly into any living ambience and becomes an eye-catcher in your home.

The smart remote control of the Skyliner III offers you convenient and intuitive control of the massage chair. You can easily switch between different massage programmes and modes, adjust the intensity or select specific massage areas. The smart technology also allows you to save your personal settings and recall them at the touch of a button. The remote control is user-friendly and ensures full control over your massage.

Experience the luxury and relaxation offered by the Skyliner III massage chair with pulse oximeter and jade heat. Invest in your well-being and treat yourself to a time out from everyday stress.

BRAINTRONICS®

The human brain is a complex organ - consisting of countless neurons that constantly produce tiny electrical impulses. Every thought, every sound and every impression, is transmitted through the tiny electrical impulses; it is the language of the brain. The sum of these impulses produces a graphic waveform. These waves are called brain waves.

And now you can use these brain waves actively! With the innovative combination of braintronics® audio stimulation, guided meditation and soothing massage, you can achieve various states of relaxation. With Casada, you can unleash the power of your brainwaves and achieve a new level of relaxation and well-being. Whether you want to sustainably improve your concentration, deeply relax or simply treat yourself - This unique combination of technology and wellness allows you to enjoy an incomparable experience of well-being.
